Bring your stage to life with 40 HEX Panel IP — a powerful, IP65-rated wash, blinder, and strobe designed for the demands of live production. Its rugged all-metal housing stands up to dust, rain, and humidity — ideal for theaters, churches, and live event rigs.

The ADJ 40 HEX Panel IP is a versatile, IP65-rated fixture designed for both indoor and outdoor applications as a wash light, blinder, or color strobe. It is equipped with 40x 20W HEX LEDs (6-in-1: RGBAL+UV) and features 10 independently controllable sections with Pixel Zone Control. Its durable all-metal, black housing is IP65-rated, offering protection against dust, sand, moisture, and liquids. A magnetic, removable filter frame allows for the addition of a diffusion filter to adjust the beam angle.

The rear panel includes IP65-rated 5-pin DMX In/Out and power locking In/Out connections, enabling seamless daisy chaining of power and data. Both the DMX and power ports are shielded with rubber protective covers. An intuitive OLED display with touch-sensitive buttons ensures easy access to the fixture’s functions.
