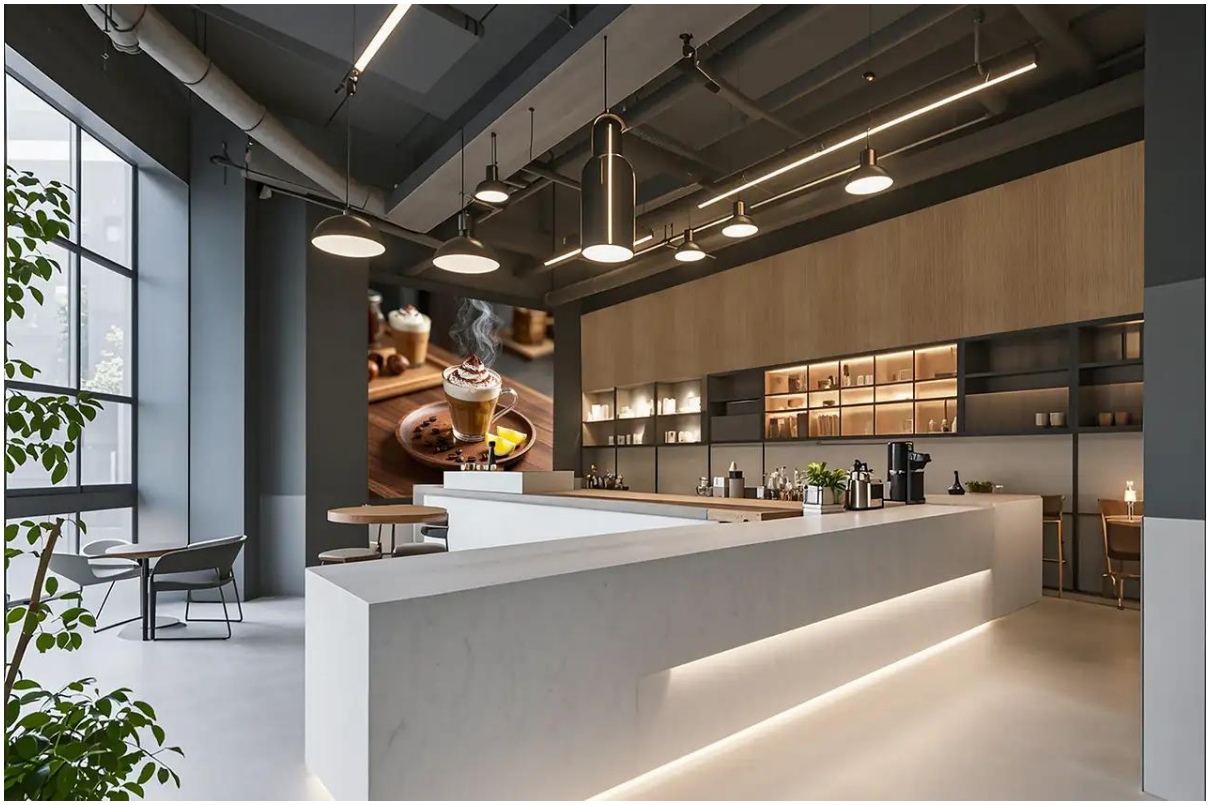
U-Natural – Turn off the Display, Turn on the Art

Posted on April 9, 2026



The Unilumin Texture Screen is committed to integrating the art of display into building materials, breaking through the constraints of traditional black displays, achieving the integration with the environment when the screen is off and living in harmony with various decorative designs. When the screen is on, it can display fine and beautiful pictures.

Screen Wall

nano-optical solution

Unilumin’s nano-optical layer is natively compounded onto the surface of Unilumin’s self-developed COB/MIP. It has no additional light loss and can maintain the high brightness of the product. Besides, it has excellent color cast suppression.
