

260 VuePix Q3.9 panels for Clifton Productions

Posted on April 3, 2017

Clifton Productions just landed a great quantity of VuePix HD Q3.9 LED panels!

“The key features that stood out when deciding on the VuePix Q Series cabinets were it’s excellent grey scale and high contrast black faced LED’s”, says James Pavey, Clifton’s Product Manager.

The Screens were put straight throughout their design paces at Cisco Live, held at the Melbourne Convention and Exhibition Centre this month.

“We worked closely with Cisco, PDK Corporate Events and Exhibit Systems to deliver an entrance arch spanning the concourse, LED pillars, a reception desk and 2 x 60 degree raked screens rigged within an inverted pyramid on the Cisco Stand”, adds James.

Designed specifically for staging and rental markets, the VuePix Q series panels offer extra features that make the set up and installation much easier and quicker.
