40 year strong LSC is on an exciting new path

LSC Control Systems is the next incarnation of the LSC business name – this change marks an exciting new direction for the company as it continues its expansion into other areas of the entertainment industry.

The LSC family began trading as LSC Electronics in 1980, as a company of contract electronic designers. In 1997 it was rebranded as LSC Lighting Systems, to reflect its total focus on computerised lighting control systems.

LSC has forged an enviable reputation in lighting – pioneering and delivering many industry firsts. Over the past 10 years, LSC has expanded again to pursue opportunities in the audio, video and show-power segments of the industry, especially in user-friendly control systems.

The name Control Systems was chosen to reflect the company's new product and marketing direction, extending beyond the traditional lighting market and into the video and audio segments. The well-known LSC logo and familiar colour scheme remain. The name change will take effect from December 7, 2020 and our ABN, management and ownership also remain unchanged.

All company email addresses will change from @lsclighting.com.au to @lsccontrol.com.au however, existing email addresses will be maintained and emails will be forwarded to the new addresses for several months.

As technology develops and solutions become more integrated, LSC will be ideally positioned to

40 year strong LSC is on an exciting new path

take advantage of new markets, develop new products and consequently, reach new customers.

Stay tuned, LSC is in Control.
