

ABSA

Bank's Results Presentation for 2009 was a significant occasion held at the Sandton Convention Centre on the 16th February 2010 with MGG Production supplying the full technical rig.

“A rendering was sold to ABSA and we had to recreate this as best we could within the budget made available,” commented Herman Wessels from MGG. 24 x Robe StageQube 324 LED Panels formed the stage backdrop and Robe 700 Spots were used to project the ABSA logo onto the wall. Six “Totem” type truss fixtures, fitted with base plates, were positioned along both sides of the auditorium and acted as stands onto which Robe 700 Spots were placed. A straight truss over the stage was home to the remaining equipment, namely 6 x Robe 700 Washes, 18 Digital LED Parcans and 6 Profiles, which once again emphasised the bank’s corporate colours.

Control was

from a grandma full size and the Avolites Art 2000 Powercube dimmer, renowned for its professional finishes, received a thumbs up from the electrician who supplied the COC.

Equipment list:

6 x Robe 700 Wash

6 x Robe 700 Spot
