ADJ Focus Flex L7

Posted on July 25, 2025

The Focus Flex L7 offers lighting designers the creative flexibility of generating vibrant washes, punchy beams, and eye-catching pixel effects from one compact and quick automated luminaire.

Powered by an array of seven potent 40-Watt 4-in-1 RGBL color mixing LEDs, each of which can be controlled independently, it offers a motorized zoom function providing the versatility of a variable beam angle of between 6 and 55-degrees.

With a variety of DMX mode options appropriate to different applications, it offers virtual CMY color mixing and virtual foreground and background color wheel control as well as a choice of seven different DMX modes ranging from 16 to 50 channels.
