Anolis, a premium architectural lighting range

Anolis is a premium manufacturer of architectural LED lighting based in the Czech Republic and is the architectural division of Robe lighting S.R.O. The fixtures are available in South Africa from DWR Distribution.

Anolis was founded in 2005 with the mission of producing the best [LED lighting fixtures](#) on the market. From the beginning, they have pushed the boundaries of LED technology for optimum

light output, LED longevity and the breadth of applications that can be successfully lit, for the benefit of their customers.

Anolis is proud to manufacture all fixtures at their global Headquarters in the Czech Republic, where they have complete control over the whole production process. All fixtures are ETL / cETL, CE and RoHS certified so you can be sure they will comply with local compliance laws. Only the best components are used in the production of Anolis products, alongside the latest manufacturing techniques and machines, to ensure optimum performance for many years to come - even in the toughest environmental conditions. All fixtures undergo intensive product testing to confirm perfect performance before being shipped.
