ArKaos KLing-Force LED

ArKaos announced during PLS the launch of **Kling-Force LED**, a truly **plug-and-play** interface which completely revolutionizes pixel control.

With powerful features, such as auto **configuration** and **drag and drop**, Kling-Force finally puts an end to the painful process of complex pixel control. **Compatible** with most manufacturers' LEDs, this technology is creating tremendous opportunities for creativity.

Kling-Force LED's technical capabilities and features are clearly impactful.
It's **flexible, powerful, highly intuitive** and **affordable**. With this interface, you no longer have to use expensive, complex pixel drivers to driver LED tapes. An intelligent technology, which finally provides a solution to a long-standing market, need.

Our mission is to consistently provide you with innovations that are **Designed to Perform**. We have pulled together a few items to help you present Kling-Force LED successfully.

Target Audience:

- Architectural Market
- Clubs and Venues
- Theatre
- TV – Broadcast Installations
- Permanent Installations
- Corporate

Technical Specifications:

- 8 LED Strips outputs
- 400 Pixels per output
- External power supply 5v or 12V
- Supports a large range of LED chips
- 3 or 4 wires
- Gigabit switch built in
- Intelligent protection
- Full flexibility
