

Arkaos VS4 4K Media Server

Posted on May 23, 2023

VS4 is a feature-packed, intuitive and fun to use visual tool as well as a cost-efficient 19 inch rack mounting solution for all scenarios requiring full control over a range of media inputs.

Running seamlessly with the latest ArKaos MediaMaster software, VS4 interfaces and works harmoniously with any lighting console, and is targeted at high end television studios, streaming facilities and broadcast scenarios. With this exceptionally rugged engineering, it is also ideal for

production, touring and rental markets.

Two interface screens enable monitoring, there is full USB connectivity on the front via two robust ports and a Neutrik PowerCON True1 for power.

With up to 4x4K or 16 x HD screens running from one VS4, devices can also be networked together for controlling even more screens. The screens can be remotely EDID locked, while the front panel LEDs can be programmed to display different colours to indicate status or assist with fault finding.

PLUG AND PLAY SIMPLICITY

Each server comes installed with MediaMaster Pro

Runs 4K video on its multiple outputs

4x4K or 16 HD screens

MAKE DAY-TO-DAY OR ON-THE-ROAD MAINTENANCE EASY

The backplate opens and the cables can be extended so if a connector needs to be swapped out, the process is straightforward and painless.

LED illumination on the rear allows technicians to see what's happening in the dark - handy when working onstage, on a set or in any dark corner or recess!

FULLY MODULAR SYSTEM

VS4 units can be built up as required by adding input cards. The basic version comes with power and output cards allowing users to tailor precisely to their needs and also utilise their budgets

efficiently.
