Avolites Titan One Training

Avolites Titan One Training will be hosted at DWR Distribution, Johannesburg, on 24th February 2015. The course will be presented by Gareth Chambers.

The Titan One has proved to be a cost effective solution for lighting applications. It offers fast and intuitive control of intelligent lighting, dimmers and LED effects from one on screen console.

> "The Titan One is a small but powerful lighting solution," commented Nick Britz from DWR. "Gareth Chambers hosts regular training sessions which are well received by the industry. He has a great knowledge on lighting and control, having formally worked in the rental market. He is also very passionate about sharing this knowledge."

Titan One DMX USB Dongle allows the user to output one line of DMX with the full functionality of Avolites Titan Software. Users are able to access powerful features such as Pixelmapper, Quicksketch, Media Clip Select, Attribute Control-Blades and ShapeGenerator. Titan One allows unlimited usage providing uninterrupted programming and playback time.

"Once delegates have a better understaind of how the software works, it helps build confidence when running shows," added Britz.

The one day course includes lunch and the cost is a R350.00 incl VAT per delegate.

Delegates are requested to provide laptops with the latest version of the Titan software, as well as another machine or laptop to run the visualizer.
