(for single & multi-cameras)

DWR
distribution

DWR Distribution is delighted to invite you to the Broadcast Studio Lighting Training Course presented by the legendary Andre Rossouw on 21 - 22 June from 9am to 4pm.

Broadcast Studio Lighting Workshop

With a career spanning almost four decades at the South African Broadcasting Corporation (SABC), Andre has worked as a lighting designer, electrician and held a specialist position in electrical distribution on outside productions, where he streamlined a system that kept the power on! Andre is recognized for his role in the studio environment and developing the lighting department at the SABC - with equipment ranging from lighting fixtures, digital dimmers, DMX control system, trussing, electric motors and controllers, and has also worked on major televised productions like the SAMA Awards, UN 50th Celebrations, Miss South Africa and countless sporting events.

The two-day course which will focus on studio lighting, will cover the following topics:

- Lighting Studios - Basic three-point lighting
- Lighting Outdoor Broadcast / OB for a single and multi-camera

Other topics of discussion - which any lighting designer working in a studio environment should know already - will include basic camera fundamentals, vision control, ambient and practical lighting.

The course will be held at DWR Distribution, Unit 1, Block C, Kimbult Industrial Park, 9 Zeiss Road, Laserpark, Honeydew.

The cost is R400 (non-refundable) and includes a light lunch and refreshments.
