CALICO PRO by tvONE is the first of a new line of ultra-powerful video processors with multi-window, multi-screen and multi-layer based upon tvONE's latest, fifth generation 4K/8K, 10bit processing engine on a new, high bandwidth, flexible, 2RU hardware platform.

Capable of end-to-end 4:4:4 processing, combined with the highest quality conversions between 4:2:0, 4:2:2 and 4:4:4 color spaces, makes CALICO the most innovative and flexible technology on the market. CALICO PRO supports up to 66 million pixels with standard or custom resolutions to implement LED with total precision including 30bit True Color.

Use CALICO PRO for pixel precision video processing in all your medium and large installations.
