

Cape Town welcomes DiGiCo Training!

An intensive one day DiGiCo Training course was presented by DWR Distribution's Kyle Robson in July with the emphasis on both the S and SD range.

"We had ten delegates from various companies, consisting of both old and new users, attending," said Kyle. "The main focus was to educate the users on how to use both the S and SD range comfortably and we also shared tips and tricks to show just how powerful the platform is."

There was great excitement as delegates soaked up the knowledge, appreciative that the training also covered a number of problem solving issues. "There was a huge interest in this and everyone gained a deeper knowledge of the internals of the systems," commented Kyle. "The course was well received and I'm very grateful to everyone who attended. Thank you."
