

CLAY PAKY AT PROLIGHT+SOUND 2016

Posted on April 1, 2016

ClayPaky Odeon Flood – architectural range

Clay Paky is thrilled to be celebrating its 40-year milestone at ProLight+Sound 2016 and welcomes visitors to the Clay Paky Universe, inviting you to get up close and personal with its broad portfolio of trailblazing creative tools.

We launch the SCENIUS PROFILE, the new beam shaper at the top of the Clay Paky moving head range. Its advanced optical unit and the 1400W OSRAM discharge lamp provide very high light output and an excellent CRI. Its framing system consists of four independent overlapping blades which create shapes of all sizes and proportions by working simultaneously on four different focal planes

The HEPIKOS is a 700W washlight that combines low power consumption with color quality, without compromise. Thanks to its PC front lens (Ø 185mm) and narrow 5° beam angle, the

fixture can also produce a sharp, thick beam, which can be used for striking, colored aerial effects.

ClayPaky SharBar

The SHAR-BAR is an advanced moving LED bar with features that transform it into a brand new multi-beam effect light. It fits six 30W powerful new OSRAM Ostar RGBW LEDs. The optical unit coupled to each LED consists of a motorized system with double mirror: this means each light beam can be pointed independently of the others or locked within a 60° (+/-30°) cone. Thanks to this ingenious, original optical unit, the SHAR-BAR can produce an effect similar to six separate lights working synchronously or asynchronously.

ClayPaky Odeon Graze –
architectural range

ODEON

is a series of pure architectural lights (IP66), which are designed for architects on the basis of their requirements and their needs. They come in two main versions – flood and linear – in a range of more than thirty models. They are available with 5°, 25°, 45° optics and RGBW, Tunable White and Total White configurations; also, they may be further customized in terms of size and finish.
