

CLAYPAKY NEW PRODUCTS AT PROLIGHT+SOUND 2017

With the **Axcor Profile 900**, Claypaky has launched a new course in its design research: it is the first Claypaky spotlight to use a LED light source, instead of a traditional discharge lamp. Claypaky has chosen to use a white LED engine with high luminous efficiency, total power of 900 watts and luminous flux of 24,000 lumen output, and couple it with a system of dichroic filters to create the colors. Thanks to its considerable light output, the Claypaky Axcor Profile 900 goes straight in at the top of its category and features the best in modern technology in every parameter: the characteristics of the white and colored light it produces, its ability to form perfectly sharp projections, and the precision micro-mechanics of its exclusive beam shaping system.

Claypaky Axcor Profile 900

After the B-EYE, which revolutionized the world of LED wash lights with its extraordinary effects, Claypaky has now launched the **K-EYE HCR**, a LED wash light which provides total control over the quality of all forms of white or colored light. The new HCR technology used in the K-EYE is an exclusive electronic platform developed by Claypaky in conjunction with Osram to meet the needs of lighting designers all over the world who were not fully satisfied with the performance of LED devices in comparison with traditional lamps, in particular because of their incomplete color range, poor color rendering index and lack of consistency. All these limitations have been overcome in the K-EYE HCR, and it is finally possible to produce every color, every nuance and every shade with satisfactory quality. The heart of the K-EYE HCR wash light is a LED light source consisting of a module with six chips, each for a different color: besides the three “classic” basic red, green and blue colors, Claypaky has added amber, cyan and lime. This exclusive Claypaky device provides a very wide color range with excellent color spectrum coverage.

Claypaky K-EYE HCR range

The **Scenius Unico** is the latest addition to the Scenius family, therefore its first highly appealing feature is the quality of its light (1400W Osram lamp, 6500K, high CRI). It is a magnificent spot light for projecting effects, with six rotating gobos, a rotating prism a beautiful animation wheel, and it is equipped with the most sophisticated and most precise framing system on the market today. The Scenius Unico is also an excellent wash light, since it features a system with different diffusion filters, which may be inserted gradually. However the most amazing feature is that the Scenius Unico can also generate a powerful narrow beam of super concentrated light, with a minimum beam angle of only 5 degrees.

Claypaky SceniusUnico

Mythos 2 offers all that you love from the original hybrid fixture but with 2 new features: new super-smooth dimming upgrade, which makes the Mythos2 suitable for the most demanding applications. New heart, new life, reliable OSRAM SIRIUS HRI® 440W lamp technology you can depend on.
