50 YEARS OF INNOVATION AND STILL PUSHING FORWARD

DWR Distribution invites you to meet Claypaky's Alessandro Melegaro and Michele Brocchieri for the **Claypaky Open Night** on **20 January from 3pm to 9pm** at our offices in Johannesburg. Get hands-on with the latest Claypaky fixtures: Ultimo Hybrid, Ultimo Sharpy, Mini Xtylos HPE, Volero Cube, and Arolla Aqua LT. Expect unbelievable technology and a time to unwind as we enjoy Prego rolls and craft beer.

About the Claypaky fixtures:

Ultimo Sharpy is more than just a comeback - it's a leap forward. Building on the legacy of the original Sharpy, this next-generation **IP66-rated beam moving head** is brighter, faster, and tougher than ever. At its heart is a custom **250W OSRAM short-arc High-Intensity Discharge (HID) lamp**, designed for maximum output and sustainability.

Imagine a hybrid fixture that is powerful, versatile, and compact. **Ultimo Hybrid** brings your vision to life, indoors or out, with **IP66 water and dust resistance**. Effortlessly shift between beam, spot, wash, and profile modes, reducing the need for extra fixtures. With intense brightness, a long-lasting short-arc lamp, and an advanced effects engine, this is a true all-in-one tool.

Mini Xtylos HPE is a small-form-factor fixture featuring Claypaky's innovative proprietary **RGB laser source**, with a 20,000-hour lifespan. It delivers saturated, deep colours with no visible hotspots, thanks to its exclusive **Turbo Colour system**.

Volero Cube is the ultimate creative building block - not just a single tool, but a whole toolbox packed into one compact and versatile unit. It is a unique fixture in Claypaky's portfolio and the first of a new series of compact, powerful, and flexible moving heads.

Designed for precise, pinpoint lighting, the long-throw **Arolla Aqua LT White LED Beam Moving Head Wash Light** offers advanced control for uplighting and wall washing. This weather-resistant, **IP66-rated fixture** features a **4° to 52° linear zoom range** and a powerful **900W white LED**, delivering up to **44,000 lumens** for indoor and outdoor venues. Users can adjust dimming, shutter, strobe, and eight dynamic effects, with full connectivity via **Art-Net, sACN, CRMX, DMX, and RDM**.

Claypaky Open Night!

While the event is **free**, please book to help us with catering.

Tuesday, 20 January | Johannesburg

Where: DWR Distribution, Unit C1, Kimbult Industrial Park, 9 Zeiss Road, Laser Park, Honeydew
