

Clear-Com Arcadia Central Station

Posted on October 18, 2024

Arcadia Central Station

The next generation, scalable IP intercom platform integrating the full range of FreeSpeak wireless, HelixNet wired as well as interfacing via I.V. Direct, Dante, 2-wire partyline and 4-wire. A powerhouse of intercom, with flexible licensing to right-size to any use case and expand as you grow, all in a 1RU package.

The Central Station allows the user to increase the number of ports to 168 - with port licenses available in increments of 16. As the need for greater capacity grows or a new feature is needed,

Clear-Com Arcadia Central Station

field deployable Licensed Port Upgrades can be used to increase Arcadia's intercom footprint.

With a multitude of third-party devices running on IP, the Central Station provides tremendous flexibility by allowing communication routes via 64 licensable ports.
