Clear-Com helps film and TV crew safely on set

Posted on January 6, 2021

Clear-Com’s full duplex, IP-based intercoms are helping film and TV crews remain socially distant while working on set.

While full-duplex comms systems were once used primarily by the camera operators and DP, with the new norms of socially distanced and zoned media production, more people are working remotely or at a greater distance than ever before.

In this situation, a flexible, IP-based full duplex (talk and listen at the same time) intercom system can be a mission-critical tool in keeping the team members communicating to the right people at the right time, while maintaining social distance.
