

## Deliver your client's needs with Hippotizer

Image not found or type unknown

From projection mapping a building in daylight to creating an interactive game for an audience of hundreds, corporate shows are never short of challenges. Hippotizer ensures you can exceed all the client's expectations. Hippotizer's FlexRes codec offers true Lossless 4:4:4 colour reproduction so your client's logo is perfect every time. Crossfade on Layer and presets makes setting and recalling looks instant, no matter what order the presenters arrive. Hippotizer's intuitive layer composition system, stock content and extensive library of effects ensures that even a little content goes a long way.

- FlexRes Lossless Codec
- Crossfade on Layer
- Presets
