

DiGiCo S21 for Swaziland

Posted on February 8, 2019

Thabani Ngcamphalala and Sandile Dlamini

Ten Concepts, a Swaziland based hire company for audio, visual and lighting equipment, have invested in a DiGiCo S21 with D2 rack, purchased from South African distributor, DWR Distribution.

For a young company, only established by Thabani Ngcamphalala in 2016, Ten Concepts has enjoyed tremendous growth in a short period. The DiGiCo S21 was the perfect solution, combining technology and high quality, at an affordable price.

“When I saw the DiGiCo S21 on the internet I was sold,” said Thabani. “I love the touchscreen and being

able to move files from one screen to the other without a problem. It's so user friendly."

Thabani will be using the console for corporate events and shows, and is particularly looking forward to making use of the DiGiCo platform for live events.
