

DMX KingLeDMX4 PRO

Posted on May 10, 2021

Available in 5V and 12-24V variants

An OEM Board for direct sACN/E1.31 and Art-Net to RGB/RGBW pixel strip/array control.

Compact and feature packed you'll find it easy to design into your applications with the ability to scale as big as you like whilst keeping everything synchronized. Designed and manufactured in New Zealand to the highest standards LeDMX4 PRO is a professional product you can rely on backed by our world renowned after sales support.

Firmware v2.6 LeDMX4 PRO now offers ArtNet/sACN stream merging and sACN Priority overrides giving end users the ability to bring the best of different lighting control systems and media servers together seamlessly. No other pixel controller offers such flexibility.

Firmware v3.0+ LeDMX4 PRO includes show recording and playback from microSD card complete with sACN Priority override from an external source during playback providing many possibly use scenarios. Trigger show playback via Art-Net, sACN, DMX-IN Port and external contact closure.

Firmware v3.3+ LeDMX4 PRO now features a Master Level control to dim pixels independent of control source DMX streams.
