

DWR named official distributor for Sound Devices in South Africa

Looking forward to great times with Sound Devices and DWR Distribution!

DWR Distribution, a company known for delivering innovative gear for live events, film, television, broadcast and theatre, is honoured to announce its appointment as the official distributor for Sound Devices in South Africa.

Sound Devices, based in Reedsburg, Wisconsin, has earned global acclaim for its innovative audio solutions used on movies, TV shows and documentaries like *Dune: Part Two*, *Wicked*, and *Squid Game* with local back up and support. With over 20 years of experience in manufacturing, their equipment is renowned for its rugged durability and exceptional audio performance. Their equipment has recorded on the world's highest mountains, the hottest deserts, humid rainforests and the depths of the ocean!

Kyle Robson from DWR.

Sales Manager Kiah Hassall from Sound Devices comments, “We care about audio and want to help the customer understand the pitfalls and magic of everything RF-related. We have made an RF visual to save you lots of time and rack mount space and give you peace of mind that you are in safe hands. Our Astral wireless series has receivers and transmitters to suit all scenarios and our portfolio is only growing in the right direction. We are proud and grateful to DWR for supporting our distribution in South Africa and look forward to changing the RF world together. Let’s make history!”

Gary Trender, RF Applications Engineer at Sound Devices, adds, “We are proud to partner with DWR as our official distributor for South Africa. Their dedication to quality and customer service aligns perfectly with our mission.”

Needless to say, in South Africa there's buzz! "We're stocked and ready to go," shared Kyle Robson from DWR Distribution. "Setting up our demo gear at the office has been an amazing experience, and we can't wait to showcase it to our clients. I especially look forward to offering the A20-Nexus and SuperNexus wireless receivers!" The range includes wireless receivers, handheld microphones, and bodypack transmitters.

"I'm almost as excited as Kyle Robson," smiled Duncan Riley, founder of DWR. "Thank you for this opportunity. We look forward to taking our audio offerings to the next level and giving our customers something we're certain they'll want and love."
