

Multiple Parnelli Awards, multiple Tour Link Top Dog of the Year Awards, Monitor Engineer for countless megabands like Iron Maiden, Linkin Park, Judas Priest and many more, as well as quite recently show host for "The Wrong End of the Snake" together with Ken "Pooch" Van Druten: Kevin Tater McCarthy is a long time member of the KLANG:family and close friend, and we are honored and excited to have him join us for a Q&A session!

Mastering and combining multiple disciplines, Becky Pell is not only a world class monitor engineer with an impressive track record of worldwide stadium tours (Westlife, Anastacia, Jeff Wayne's War of the Worlds and many more) – she is also a successful Yoga teacher/blogger (our favorite is Tourbus Bunk Yoga!) as well as author for several magazines. Long story short: this should be an interesting chat!

Jason "Redz" Reynolds is joining us to chat about his experiences as a monitor engineer for Stephen Marley, The Marley Brothers as well as Shaggy. Join us, ask him any questions and learn from the fantastic guy behind "Learn from the Pros"

Klang have a list of previously hosted webinars, covering a variety of topics, to help you get started with immersive technology. If you have the time, it's really worth the watch!

You can select previous workshop videos and sign up to be notified of any upcoming events.
