

Gearhouse invest in 48 Pointes

South Africa's largest rental company, Gearhouse South Africa, have added 48 x Robe Robin Pointes to their inventory which went straight onto War Horse, Vodacom in the City and various other events.

"The Pointes are a market leading product in terms of innovation and flexibility," commented Stuart Andrews, Lighting Operations Manager for Gearhouse SA, Johannesburg. "We compared many other products from a variety of manufacturers and they still won hands down. The units have been, as I thought, the star of the show."

The Robin Pointes are known for their bright, super-fast and sharp parallel beam that cuts through the air and across video with ease.

Smiled Stuart Andrews, "I look forward to the launch of the Pointe 2."
