HYDRA PANEL

MOUNT ANYWHERE, LIGHT ANYTHING

Beam shaping with six included light modifiers and a large range of mounting options make HydraPanel more flexible than any other product in its class. The full-spectrum Titan LED Engine generates an impressive 1300 Lumen output while running on battery power for 1:45h. All packed into a solid watertight housing of just 600g weight and 166mm length.

Foldable foot for setup on flat surfaces

Cold Shoe for third-party accessories and to attach on cameras

Baby-pin included for mounting on stands and via SuperClamp

Combine units to build a bigger panel
