

Green Hippo Previews Hippotizer MX Series with ACT Entertainment at LDI 2024

Las Vegas, NV – Green Hippo, an industry leader in media manipulation and 3D mapping, is thrilled to preview its new Hippotizer MX Series on ACT Entertainment booth #2808 at Live Design International 2024. The Hippotizer MX Series offers five new customizable, dependable, and future-proofed Media Server solutions that enhance workflow efficiency with the best in high-quality playback and purpose-built design.

Building off 20 years of robust and dependable hardware, the Hippotizer MX Series will provide 10-bit video playback for accurate color reproduction, supporting SMPTE 2110 and IPMX workflows, as well as easy system customization, and seamless delivery of large media and quality playback. Crafted for designers, touring professionals and integrators, the new solutions offer rear-chassis illumination, upgradeable and swappable media drives, customizable output configurations, and an OLED display.

As the exclusive distributor of Green Hippo products in North America, ACT Entertainment will be the first to preview the MX series on booth #2808 at LDI 2024.

“We are excited to reveal Green Hippo’s groundbreaking Hippotizer MX Series and see how it empowers Live Event and Pro AV professionals to push the boundaries of creativity, all while simplifying the technical demands of large-scale productions,” says Nick Spencer, Technical Product Manager, Green Hippo. “LDI is the perfect stage to share this breakthrough with the industry and engage with the talented professionals who continue to inspire us.”

Green Hippo and ACT Entertainment welcome visitors to stop by booth #2808 on December 8 – 10, 2024 at the Las Vegas Convention Center – West Hall.
