

Green Hippo Software Update: Hippotizer V4.3.2

Posted on March 20, 2018

Green Hippo is proud to announce the release of the latest software for Hippotizer V4 and V4+ Media Servers: Version 4.3.2.

We recommend that anyone running 4.3.1 or 4.3.0, upgrades to this newer version for improved stability and performance.

Significant changes include:

- Improvements to the stability of tabbed selectors in ZooKeeper.
- Fixed the issue causing the depth of a scene in Visualiser to render incorrectly.
- Fixed the issue where performance could be degraded by DMX controlling

Pixelmap select.

For a full list of changes, please see the [release notes](#)
