Introducing MADRIX Online Training

The new MADRIX Online Training is based on the popular MADRIX Training attendance courses and now make these valuable lessons accessible around the world by bringing them directly to you.

Extensive user manuals, online tutorials, and more and more video tutorials are already available online for self-study at help.madrix.com

Now, three new in-depth courses cover the MADRIX 5 Software and its powerful features for creative pixel mapping in guided online lessons.

The courses are available in English and German and the first time slots are scheduled for November 2021.

As a bonus, you will receive a 'MADRIX 5 KEY start' software product for free when booking all three courses.

We are looking forward to seeing all participants online.
