

Introducing the new FreeSpeak Edge Base Station!

FreeSpeak *EDGE*® Base Station

Supports Full Range of FreeSpeak™ Products, 1.9, 2.4 and 5 GHz
Third-party Dante Interoperability
Support for IP Transceivers

The FreeSpeak Edge Base Station is IP-based and supports the full range of award-winning FreeSpeak digital wireless intercom solutions including 1.9 GHz (including both E1 and IP transceivers), 2.4 GHz and 5 GHz, as well as third-party Dante devices.

The system that is ideally suited for live event settings, or any application where time is of the essence!
