

Introducing the Strand Acclaim LED Series Luminaires

For over 25 years, the name Acclaim set the standard worldwide for 500W/650W theatrical luminaires. Drawing on over a hundred years of theatrical lighting expertise, the Strand Acclaim LED Series is designed to give maximum performance for small to mid-sized theatrical stages and studio spaces. From perfectly controlled stage washes to dramatic highlights, this complete range of theatrical luminaires is ideally suited for education theatre spaces, community stages, and small houses of worship.

For a consistent, high quality experience throughout the range, the Acclaim LED Series uses a custom LED multi-spectral light source, offering exceptional output and full color mixing packaged into a family of compact theatrical luminaires available in black or white body colors. With a full range of theatrical luminaires, including a true theatrical Fresnel, the Acclaim LED Series offers a complete solution for smaller theatrical spaces.

Strand Acclaim LED Fresnel

The Strand Acclaim LED Fresnel is a true full color theatrical Fresnel wash fixture designed specifically for small to medium spaces, with saturated stage color washes and dramatic highlighting capabilities thanks to the high quality, industry standard 4.75" front lens coupled with engineering excellence. The Acclaim LED Fresnel offers superior control and light quality to comparable PAR fixtures, and the adjustable 10° to 40° zoom provides manual adjustment with minimal light scatter.

Strand Acclaim LED Zoomspot

The Acclaim LED Zoomspot offers high output and full color mixing in a single, cost-effective fixture designed for precision key lighting and gobo projection. With an integrated 25° to 50° manual zoom and focus and a four-blade manual shutter system, it provides precise adjustment of the flat, even beam to key light performers or highlight parts of the set. For applications with a shorter trim height, the integrated adjustable yoke allows the fixture to be hung closer to the suspension position.

Strand Acclaim LED Profile Light Engine (PLE)

The Acclaim LED PLE brings the innovation that made Acclaim ellipsoids an industry standard for a generation in a full color LED light engine that works with Strand SPX lenses, for consistent color mixing to the Acclaim LED Zoomspot in applications where a longer throw or wider spread is needed. Designers can project depth and texture on stage thanks to the optional size B metal gobo holder, and the adjustable yoke allows the fixture to be positioned closer to the suspension point to give more headroom.

Strand Acclaim LED Cyc

Coming in Spring 2022, the Strand Acclaim LED Cyc is a full color cyclorama luminaire designed specifically for small to medium-sized theatrical spaces. A true cyclorama luminaire, the Acclaim LED Cyc's uniquely shaped asymmetric reflector design and 5,000 lumens of output bring wide coverage and consistent light distribution.
