

Jordan's prestigious Amman Academy opts for Strand and Vari-Lite

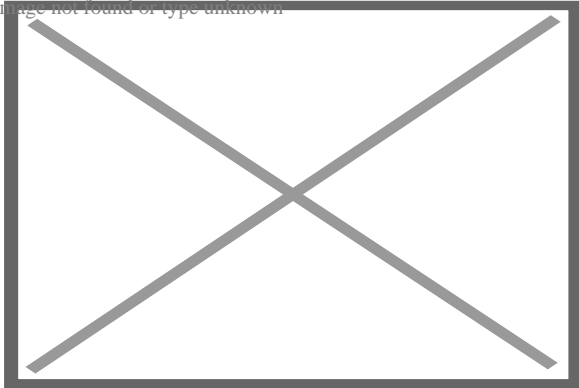

Amman, Jordan – Amman Academy's brand-new theater space is open for 2022, offering students and educators world-class, professional lighting with a range of Strand and Vari-Lite luminaires and control from Signify (Euronext: LIGHT), the world leader in lighting.

The prestigious private school, which is renowned in Jordan for its academic excellence, constructed the new theater space to offer performance, rehearsal, and meetings facilities. Its lighting solution needed to be adaptable, encourage creativity and provide reliable workhorse and effects fixtures. The Academy's team approached Amman-based International New Technical Est. (INTE), a systems integrator specializing in theater installations. INTE's Project Manager Hashem Nazzal specified a Strand NEO console for control, with the Vari-Lite VL2600 SPOT on color-rich effects duty.

“One of the most important requirements of this project was flexibility and effects options, and the VL2600 SPOT offers this and so much more, including fast and accurate movement and fast color switching,” says Nazzal, who also served as electrical engineer on the project. “We demoed the VL2600 SPOT and discussed the importance of professional lighting in theater, if they wanted to achieve the best, and the owners reacted positively.”

In total, more than 92 fixtures from the Signify stable were specified, including the Strand variable beam PLPROFILE1 MKII, energy-efficient PLCYC1 MKII LED cyc luminaire, and the powerful honeycomb color-rich Vari-Lite PUNCHLITE 220.

Strandâ€™s NEO CONSOLE is providing intuitive, powerful control options, matched with the eight port DMX node. â€œWe have been working with Strand consoles for very long time and they have our full confidence,â€• Nazzal continues. â€œStrand products are very reliable, made to work for long hours in addition to being a world leader in developing the technologies in this industry. NEO is simple to use and offers many ways to achieve the same goal. The ability to expand it is also a great added value. Vari-Lite and Strand is the quality that people trust.â€•

The Vari-Lite, Strand and Selecon products join a host of professional AV equipment in the new theater space, which seats more than 430 people.
