Carefully orchestrated from the invitations to the final classical rock production, the EOH Spring Ball was a outstanding banquet held at the Sandton Convention Centre's Pavilion Venue in Sandton. For the second consecutive year, AVL Productions supplied the technical including set and AV content while Keystone Productions were delighted to provide the lighting requirements including 16 Philips Vari-Lite VLX fixtures.

featured songs of

The master of ceremonies was non-other than South African Idols judge, Randall Abraham. The performers were outstanding and included Joseph Clark who does a remarkable impression of Freddie Mercury, Lauren

AVL Productions'

role in the show.

With back-to-back

bookings at the venue, it was a one-day lead-in and there was only one rehearsal at the venue prior to the show. Christopher spoke of 'working in time,' and the venue had its own music system, so they didn't need general

the end result.

"I love working at this venue because of the ceiling height," commented Christopher. The trussing over the stage was 11m off the ground above the 16m x 4m screen. "The ClayPaky Sharpies cut through the air in the venue. They were placed on the second level of the set, and shone just over the audience's heads. Christopher, as usual, specified a MDG Atmosphere APS. You simply can't match its discreet yet visual presence," he said. "It's incredible how one machine can fill a venue of that size in a matter of minutes."

trussing, each with
Compact.

The show could

not have ended on a higher note. When it ended, Christopher went home, had a glass of wine and climbed into bed by 1h30. His expecting wife was staying with friends while he worked on this project. About fifteen minutes later, Christopher received the phone call that baby was on its way. Beautiful little Isabella was born at 06h45

Congratulations

to all involved on the EOH Spring Ball, and even more so to the proud new dad.
