

Kilowatt AV create magic in Pilanesberg

The Pilanesberg National Park was the graceful setting for AMWAY's 20th Celebration Dinner. As guests sat around a roaring fire at the BOMA at Sun City, the rustic mood was given a modern twist with a significant collection of lighting equipment supplied by Kilowatt AV.

Their client, Red Hot Events, commissioned Kilowatt AV to deliver the full technical and Set solution for the event.

Lighting control was on a GrandMA2 Full Size and the lighting rig was nothing less than 48 Clay Paky Sharpys and over 160 Robe fixtures! In addition there were four Robert Juliat Aramis Follow spots, Showline SL Nitro 510 Strobes and Philips Selecon SPX Axial 15-35 ° Zoomspot Profiles.

Kilowatt AV are known for creating inspiring experiences, ensuring each occasion has it's own personal signature. In this case they designed and manufactured giant animal heads, which created a gorgeous backdrop. They also supplied six 3m diameter helium balloons, printed with the Amway logo, which floated above the crowd.

"We exceeded our client's expectations with our custom set and decor elements, something which I feel Kilowatt AV is very strong at," said Neil Zaayman, National Sales Manager from Kilowatt AV.

The production was a pleasure to work on even though the language barrier created some interesting challenges! "The entire show was in Mandarin so we had to take cues based on time markers on a script and hand gestures from the international show caller," explained Neil. "This made it a fun and exciting show. It was great to learn about other cultures and refreshing to know that we are very close, if not on par, with international standards in regards to technical knowledge and equipment. "

For an absolutely awesome idea to see how the event took place, please also see a Youtube video link : https://youtu.be/BtdWwCc_1rY
