

Kings of Leon

22 November 2011

Congratulations to Gearhouse South Africa on the Kings of Leon tour! Gearhouse purchased 72 x Robin 600 LEDWash fixtures to facilitate the growing demand for these fixtures for events such as this. The concert was held at the Cape Town Stadium on 26th October and for the Johannesburg fans two days later, at The Soccer City Complex, FNB Stadium. A grandMA was the console for this event.

An enormous African thunderstorm the night before the Johannesburg concert certainly added a touch of apprehension and caused a four hour delay on the load in! The professional Gearhouse team ensured a gig without a glitch.

Our appreciation extends to Gaston Roulstone for the use of his photos.
