DWR
distribution

DWR Distribution is delighted to invite you to join Kyle Robson for practical Klang Immersive In-Ear Mixing training on 1 April 2022 from 9 am to 4 pm at our offices in Johannesburg.

Klang Immersive in-ear mixing training

The course starts with a Klang Product Overview and then dives into a user-friendly introduction to binaural. What is binaural? How can we hear 3-dimensional with only two ears? What is happening in the brain? How can we use this knowledge for our IEM mixes? Kyle will help answer all these questions and guide users in building an immersive experience.

“Klang is on top of their game when it comes to immersive mixing technology,” said Kyle Robson. “With this in mind, we are very excited that everyone attending will get an opportunity to have a hands-on experience with the tech and knowledge into the future of immersive mixing.”

The cost is R200 per person, nonrefundable and includes a light lunch and refreshments.

The course will be hosted at the DWR offices, Block C, Unit 1, Kimbult Industrial Park, 9 Zeiss Street, Laserpark, Honeydew.

Delegates to supply their own PC or Mac with the Klang application (<https://www.klang.com/#klangapp>) and headphones.
