Professional Live Applications

KLOTZ EDX6HMF: 6-Channel HDX Power Distribution Box for Professional Live Applications

Posted on October 22, 2026

When reliability and operational safety are essential in live productions, the KLOTZ EDX6HMF 6-channel HDX power distribution box comes into its own. Designed for use on stage and in temporary installations, it combines robust construction with safe handling and practical connectivity.

The EDX6HMF features two Harting HAN 16ES connectors in male and female configurations. The multipin connectors are side-mounted and feature lockable metal coupling housings that prevent

KLOTZ EDX6HMF: 6-Channel HDX Power Distribution Box for Professional Live Applications

Made in Germany: Every EDX6HMF is manufactured at the KLOTZ AIS production facility in Vilchband/Wittighausen and undergoes comprehensive quality control at the company's in-house end-of-line (EOL) test station before delivery. Tests include checks for open circuits, reversed polarity and short circuits, as well as protective conductor and insulation resistance in accordance with DIN VDE 0701 and VDE 0702. Once all tests have been completed, the power distribution box is ready for delivery to the customer and reliable use in live productions worldwide.
