

Le Matire MVS Hazer

Geared towards small to large sized venues, the Le Matire MVS is powerful and versatile. Two variable speed high power fans can be used to control the force and direction of the haze stream. There is even an oscillating mode for automated back and forth sweeping of the stream. Variable haze density, onboard DMX, and the ability to position the unit at any angle combine to form the most complete feature set of the Le Maitre hazer line.

Features Include:

Dual high power variable speed fans

Sweeping haze projection

Low fluid consumption: 3cc/hr – 80cc/hr (800hrs/2.5L to 30hrs/2.5L bottle)

Average fluid consumption 65hrs/2.5L

Onboard DMX 512 support

Can operate in any position

Includes a rugged, storable multi-function mounting bracket

Low power consumption

Automatic self-cleaning upon power-up

Made in the UK
