

# Love at first sight as Blackmotion receive their LEDBeam150s

Posted on November 19, 2024

Kagiso Moima Masimini from Blackmotion and his new Robe LEDBeam 150

Congratulations to Kagiso Moima Masimini and the team at Blackmotion, a Johannesburg-based rental company, on your new Robe LEDBeam 150s purchased from DWR Distribution. The units are set to go straight onto a television show coming soon on SABC 2 (The South African Broadcasting Corporation) every Sunday.

Kagiso, fondly known as KG, has relied on Robe LEDBeam 100s for years, with 24 units already in his arsenal. "In more recent times, I've used the Robe LEDBeam 150s at numerous events - there's a lot of punch from these lights which is quite amazing, I like the colour blend they

provide, and I'm impressed by the 3.8 to 60 zoom range," he says. "Eight is a good start, but we'll keep increasing the quantity to ensure we have at least 24 units in the future."

KG envisions them playing a key role in future live concerts and additional TV studio work. They'll also be available for dry hire through our sister company Outlaw Gear Rental.

Blackmotion's LEDBeam 150s are set to go straight onto a television show coming soon on SABC 2

The LEDBeam 150s bring powerful sweeping beams and a high-quality, far-reaching wash in a compact form. With a zoom range from 3.8° to 60°, they feature Robe's innovative lens coating technology, which enhances brightness, keeps lenses clear, resists scratches, and extends cleaning intervals.

“Thank you, thank you, thank you DWR for this amazing partnership,” KG adds. “It has been twenty years of great support and the team is amazing, always willing to help and to come on board to assist me. Here’s to another twenty years of growth, strength, and pure support because you guys have given us sustainability to make sure that we can continue to deliver quality on all the events we do.”
