

Market Theatre invest in Robin DL4S

Nomvula Molepo, iHead of Lighting at the Market Theatre with DWR's Kevin Stannett.

The Market Theatre have invested in 8 Robin DL4S Profiles for their busy venue in Newtown Johannesburg.

The theatre was looking at an LED solution to save on costs and maintenance, a common factor these days. DWR Distribution was awarded the tender to supply the DL4S fixtures which will be used in the main theatre.

Nomvula Molepo is the Head of Lighting at the Market Theatre. "While we are yet to hang the fixtures on the lighting grid, I know that once they have been programmed they will work wonders and bring magic to our stage," she said.

"The gobo set and the framing shutters makes this an extremely versatile fixture for theatre," said Kevin Stannett of DWR Distribution. "Because of the RGBW chip you get extremely rich and high-intensity colours. We are finding that this particular fixture is receiving positive feedback from theatres worldwide and it's a privilege to now supply them to the Market Theatre. Thank you to Nomvula Molepo and your team at the Market Theatre for your valued support."
