

MDG at PRG Live Entertainment Award

MDG is very proud to announce that it has been chosen as a partner of the PRG Live Entertainment Award (LEA) at Frankfurt's Festhalle. The event, which celebrates music artists and the creative and technical teams responsible for live productions, takes place on the evening of Monday 4 April in front of 1,400 guests and will be streamed live on the internet for the first time.

MDG ATMe haze generators will be stationed back stage and front of house to produce the finest haze that will show off the award-winning lighting to its best advantage.

For the remainder of Prolight+Sound the set-up of the stage, including all installations and effects, can be viewed by all visitors to the show who will also be treated to a demonstration show every half hour. A backstage tour of the technology will also be on offer. MDG ATMe units will be part of this demonstration and tour and we hope you will all take advantage of the opportunity to see them perform in the size and style of environment they were created for.
