Travis Yeatman & Adriaan Skinner To keep up with demand, Sound Stylists have purchased an Avolites Pearl Expert and four Strong Super Trouper II 3kw followspots.

The new Super Troupers will be used at the upcoming Raw Rocks event to be held at Sun City's Superbowl with this year's concert said to be the biggest to date. "We needed something with a kick," said Kevin Glover. "A lot of the shows need more than a 50m throw when held at venues like the Superbowl or the Dome." He adds that these units work as effectively for smaller shows.

Sound Stylists' also required a back up console and opted for a second Avolites Pearl Expert. Programmers Travis Yeatman, Sam Mmethi and Adrian Skinner agree that the desk is quick, easy and user friendly. "I was a Hog II operator and it's only the last four months that I have used the Avolites console," commented Adrian. "It has been very easy to cross over."
