New dot2 software release 1.3.1.4 out now: Massive improvements

Posted on April 12, 2017

MA Lighting are proud to announce the next level of intuitive lighting control software for the dot2 console series incorporating a host of new and exciting features. The dot2 software release allows users to work even faster and more intuitively than ever before.

The new 1.3 dot2 software features a Web remote facility, allowing important remote functionality from any device with a web-browser, either wireless or cabled. More master speed faders are included allowing increased flexibility for live playback speed adjustment. Increased effects functionality with instant access to groups and blocks allow for faster adjustments of any effect. High priority playbacks for specific fader arrangement for houselights or key lights to control individually at any time and many more enhancements are also now included.

The new dot2 software now allows freely assignable sACN and Art-Net universes for DMX over Ethernet output as well as for DMX remote in. Additionally, a new version of the Fixture builder with enhanced access to the fixture settings itself allows for much more detailed adjustments of each fixture.

Intuitive operation is the core of the dot2 philosophy and with a comprehensive set of connectivity hardware on all console models, the dot2 range is suitable for most theatre, touring,

corporate, television and education lighting environments. The easy to operate dot2 software is available in multiple languages and provides on-board Help and Direct Hints to guide a new user to operate the console to its full potential. A full range of clever programming and playback features provide intuitive access to advanced functionality.

This release also includes additional pre-defined position effects and several important bug-fixes. The software is available as a free download here:
