designed to open up new a new world of options for our community.

Featuring all of the creative power of its well-known bigger brothers, the Nevis+ is designed to provide a smaller, inexpensive solution for video creation, visualisation and playback, with all of Hippotizer’s software features as standard.

The Nevis+ is a half-rack or wall-mount unit, offering one display port 1.2 output with software-based EDID management, two network ports and the latest versions of Hippotizer’s user-friendly tools including SHAPE 3D Mapping, PixelMapper and the multipurpose pre-visualisation tool, all built into its Hippotizer V4 software.
