NOW-ology by MGG

25 November 2010

gates, was held at Vodaworld Midrand at

"The event demonstrated future

technology," explains Mark Gaylard, owner of MGG. To give an example (quoting from the Vodacom website): *"In less than 10 minutes the Vodacom Business team, ably assisted by Markus J Krauss, VP Service Providers Novell Europe Middle East & Arica, had added virtual servers, completed their configuration with the required operating systems, data bases and applications, as well as set the access, security levels and compliance rules. All of this was on a live system operating in the Vodacom Business Data Centre."*

It is remarkable that the technology seen

erson's daily life. NOW-ology talked of ... words foreign now but soon phrases

Hats off to Herman Wessels, LD from

MGG, who used his expertise to create a lighting show that truly enhanced the seminar, which included a presentation by Mike Lipschitz (The Science of Nowology – www.nowology.co.za).   All lighting gear, except the Robe 700 Beams which were placed on the stage area for beam work, were flown and controlled by a grandMA full size. The Vodadome within VodaWorld is equipped with a permanent large screen and MGG added three additional screens and projection as well as two ART 2000 Power Cubes.

The show looked exceptional. Congratulations to all involved.

Lighting Equipment List: 48   x

Robe Stage Qube LED Screen   1   x   Robe Media Server   1   x   Grand MA Full Size
1   x   x   Robe 700
Wash   18   Avolite Power
Qube   2   x   W/DMX
