

Black Coffee Techie memories

Brandon Bunyan from KZN rental company, Black Coffee, submitted these photos and writes:

“The back in the day Black Coffee Super-technicians. What we used to be able to do with that technology. Note the AV set-up – a laptop and a wired projector remote to switch to camera. Lighting – SGM Victories and Colourpro 400’s. The rest of the list is too frightening. The Amstel belongs to Marcus – the long haired sound dude back when the 330 boys used to run the fashion sound in Durban. Sept 2001

And my main techies were Jen(Don’t ever tell her that she doesn’t know the works) and Ken(we miss you brother) – Both still looking out for us.
