

Phase 3 Powersafe Connectors at the World Cup 2018 in Russia

RUSSIA | 03.04.2018: [Phase 3 Connectors](#), are a principal supplier of power connectors to the 2018 World Cup in Russia. Phase 3 will be helping power stadiums and public areas for the millions in attendance and ensuring TV signals can be blasted worldwide to billions of viewers. The tournament will run from June 14 – July 15, 2018.

Along with Harry Kane, Cristiano Rolando and Mo' Salah, [Powersafe power connectors](#) will be making an appearance at the World Cup. The power connectors deliver high current electricity up to 800A and will be trusted to connect the mains power supply around Russia. The industrial plugs and sockets will be used at locations such as the Saint Petersburg Stadium and Kazan Arena.

Why does the World Cup use Powersafe?

The Powersafe connector is regarded as one of the safest and most reliable powerlock type plugs in the industry. Phase 3's innovative contact design allows Powersafe to boast the industry's highest rated UL Listed rating. The finger-proof contacts, mechanically keyed locking system and cable strain relief deliver safety guaranteed; which makes the connectors the ideal choice for crowded public areas.
