

Philips Vari-Lite VL1100 LED

Posted on November 16, 2017

Unique LED engine delivering high-CRI output and dimming

The new VL1100 LED delivers high quality light and consistent color reproduction, the lighting designer's first true alternative to traditional tungsten source in a moving head fixture.

A perfect 'tungsten' color shift and an innovative hybrid cooling system smoothly optimize the balance between light output and noise.

Key features and benefits

- Exclusive low-energy Philips LED engine
- Color reproduction consistent with existing VL1100
- Hybrid liquid / forced air cooling system
- 4-blade framing system ('S' version)
- CMY color mixing system
- Continuously variable zoom range 19°-36°: super zoom angles to 70°
