

Philips Vari-Lite VL2600

Posted on March 29, 2018

Reliable, road-ready, easy to maintain and prep, the VL2600 sets new standards in performance and ROI.

The new VL2600 range is the LED generation update for the popular VL2500 Series. A full system lighting solution with dedicated Spot, Wash and Profile fixtures, it combines Vari-Lite colors and performance with the latest LED technology, all engineered to deliver the best possible package to the mid-sized show lighting segment.

Designed with the twin goals of top-class performance and cost-effective ownership in mind, the VL2600 range is not only best-in-class, but the most attractive investment available for those servicing mid-sized professional lighting applications.
