

Pixel Par Delivers

31 March 2011

MJ Event gear supplied full technical for a recent corporate event at Montecasino which featured SA's top rock band, Prime Circle. Lighting designer, Johnny Scholtz selected the Pixel Par units made by James Thomas Engineering to feature as the primary source of back light to the bands' performance.

These units gave him the flexibility of high light output with precise dimming features and a wide palette of colour mixing options – making them the perfect choice.

Rigged onto a half
