

Prolyft in SA

Posted on December 9, 2013

Jasper van der Sluis, ProLyft

It was a pleasure to welcome Jasper van der Sluis, Brand Engineer at ProLyft, to South Africa for the second time.

Jasper provided training to the team at DWR Distribution, who are the Prolyte and ProLyft distributors in South Africa. This included training on service, maintenance, certifying hoists and user-friendly advice on ProLyft Software.

Sydney Koen, Basinki Sekori, Derek Kruger, Setshaba Moumakwe, Michael van Dyk, Keith Pugin and Eazy Moeketsi from DWR.

Information on Aetos, the latest hoist from ProLyft, was also provided. "Aetos is the Greek word for Eagle," explained Jasper.

"The Aetos is really a step towards the future of rigging. It's been designed from an entertainment point of view - so it's totally adapted for our market. What distinguishes the Aetos hoist from all other hoists in the market are some unique product specifications, like the standard limit switches on all hoists, the absolute jam free chain guide and its easy maintenance."

DWR team

The DWR team wishes to thank Jasper for his valuable time, and look forward to his next visit.
